

REVISIT

A mouse is an input device used to point at or select an item on the monitor.
A mouse can be used to perform various tasks such as single-click, double-click, right-click, dragging and scrolling.

A keyboard is an input device that consists of various keys: Alphabet keys, Number keys and Special keys.

The Caps lock key is used to type text in the upper case.

The Cursor control keys are used to move the cursor up, down, left and right.

The Tab key moves the cursor to the right by many spaces.

The Esc or Escape key is used to close a menu or a dialog box.

#Critical Thinking

- If you are using the computer to play a game, work on school projects, and move around without a wire, which mouse would you use for each activity?
- You are typing a letter to your friend and accidentally typed a wrong letter while writing a sentence. Which key should you press to fix the mistake and correct the letter?

SDG Activity

Vrinesh's father's keyboard stopped working, so he threw it in the household bin. However, Vrinesh's mother practices wise trash separation. Should electronic products be discarded in the household bin as his father did, or is there a better way to dispose of them? Ask your teacher about the proper methods for discarding electronic waste.
