a. A markup language is a type of computer language that uses special codes to define the layout and style of a webpage.

b. One feature of HTML5 is that it makes it easier to add audio and video to webpages with the <audio> and <video> tags.

c. External CSS allows us to define the style for many webpages by using a single CSS file. An inline style is used to apply a unique style for a single element.

d. WYSIWYG stands for What You See Is What You Get. A WYSIWYG editors allow the developers to see what the end result will look like, when the document is created.

e. The <hr> tag is used to divide the webpage into different sections by drawing a horizontal line in the webpage.

```
<!DOCTYPE HTML>
<HTML>
<HEAD>
<TITLE> HR Tag </TITLE>
</HEAD>
<BODY>
<p>This is the first paragraph of the tag. HTML is the standard markup
language for Webpages. </p>
<hr>
<p>This is the second paragraph of the tag.HTML is the standard markup
language for Webpages.</p>
<hr>
</BODY>
</HTML>
```

5. Application based questions

- a. Yashika can use comments to make notes about the document.
- b. Prateek can use the inline style by using the style attribute with the tag to add styles directly to an HTML tag.

Syntax to use the style attribute with tag:

<TAGNAME STYLE = “ PROPERTY: VALUE;”>

- b. Yaman can use the <HR> tag to divide the webpage into different sections by drawing a horizontal line on the webpage. He can use the colour, width, align and size attributes to define some extra properties of the <HR> tag.
