

# St. Andrews Scots School

Adjacent Navniti Apartments , I.P. Extension, Patparganj, Delhi – 110092

Session: 2026-2027

Class: VIII

Subject: Computer

Topic: Ch-2 Answer Key

## Quiz Bee (Page-32)

1. You can create digital art, illustrations, and even 2D animations with it. Krita has cool features like layers and filters to add special effects to your artwork.
2. Onion Skins Docker

## Access Yourself

### 1. Tick (✓) the correct option:-

- a. (iii)                      b. (iii)                      c. (ii)                      d. (iv)

### 2. Fill in the blanks.

- a. Layer                      b. Frame                      c. Keyframe                      d. Animation Timeline

### 3. Answer in one or two words.

- a. Stage                      b. Animation                      c. Frame-by-frame raster animation

### 4. Think and answer.

- a. A frame is a single image in the sequence that makes up your animation.

A keyframe is a special frame where a new symbol instance appears in the timeline. For example, change in size, shape, colour, position, etc.

b. In Krita, the Animation feature allows users to create frame-by-frame animations using a timeline and onion skinning for smooth motion. It enables exporting animations in GIF, MP4, and image sequences while supporting multi-layer animation.

c. (i) The Stage refers to the main drawing area where you create and view your artwork and animations.

(ii) The Onion Skins Docker in Krita is a helpful tool for animators. It allows you to see multiple frames at once by showing transparent versions of the previous and next frames while you work on the current one.

### 5. Application-based questions

a. Anita can adjust the animation speed by adjusting the Frame Rate in krita.

b. Noor needs to add blank frames because they make the ball's movement look realistic. When a ball bounces, it compresses on the ground for a tiny moment before jumping back up. These blank frames help show that quick pause, making the animation smoother and more natural.
